Background of Bidadari Estate

First unveiled as a new housing area in 2013, Bidadari is envisioned to be "A Community in a Garden" where residents can live and connect with family and friends amidst a tranquil garden-like environment. It comprises four distinctive districts – Alkaff, Bartley Heights, Park Edge and Woodleigh – with a total of 12 Build-to-Order (BTO) developments providing homebuyers with quality public housing near verdant greenery and comprehensive range of amenities.

Today, 6,771 flats in Bidadari have been completed. This makes up more than 75% of the 8,872 flats launched in this estate. The remaining 2,101 flats are on track to be completed by 2025, bringing Bidadari to full completion. Residents enjoy the convenience of good transport connectivity with key public transport nodes such as the Woodleigh MRT station, and easy access to several key amenities such as a wide range of shops available at Woodleigh Mall and in the precincts.

The developments in Bidadari have been designed with the health and well-being of residents in mind. Beyond Bidadari Park and Alkaff Lake, a diverse range of greenery and community spaces have been provided within and around the HDB developments to encourage residents to interact and forge close ties with neighbours. These include rooftop gardens, courtyard gardens, and common greens with playgrounds and fitness stations strategically located for all to enjoy. These lush landscaping and green spaces integrated within and around the developments bring nature even closer to residents' doorsteps to provide a tranquil and picturesque living environment, as well as many opportunities for recreation and bonding for the community.
