

## EVERYONE CAN GET FLOOD-READY IN A

# FLASH

**F**OLLOW PUB FLOOD ALERTS | **L**EARN HOW TO BE FLOOD READY | **A**VOID FLOODED AREAS | **S**HARE PUB FLOOD UPDATES | **H**ELP OTHERS WHERE POSSIBLE

Be prepared for flash floods with F.L.A.S.H. and these handy tips to help you stay safe.

### PEDESTRIANS / COMMUTERS

Avoid flooded areas and stay on higher ground.

Do not walk through water above ankle height.

Avoid alighting at flooded bus stops.

Stay up to date with  
**PUB Flood Alerts:**

### MOTORISTS

Do not drive through water above kerb height or when road markings are not visible.

If unavoidable, drive slowly and steadily without braking.

Stay close to the middle lane as water tends to accumulate on the side lanes.

### HOME / BUSINESS OWNERS

Keep drains clear and maintain flood barriers.

Install flood barriers early when there is a risk of flood.

Move essential items to higher ground.

# FLOOD PROTECTION FOR HOMES & BUSINESSES

PUB provides flood protection devices to homes and businesses in low-lying areas. The devices can be deployed quickly during heavy rain to keep out floodwaters.

Are your premises vulnerable to flash floods? Protect them by deploying the appropriate flood protection devices.

The following devices are available for request from PUB.

## INFLATABLE FLOOD BAG

A compact, lightweight alternative to sandbags that inflates upon contact with water.

## PORTABLE FLOOD BARRIER

A modular, self-anchoring barrier that creates a dam to contain or divert floodwaters on firm surfaces.

To enquire about these flood protection devices, contact us at **1800-CALL-PUB (1800-2255-782)**.

# BUILDING COMMUNITY FLOOD RESILIENCE

Beyond strengthening our infrastructure to be more flood-resilient, PUB also engages the community and stakeholders to be more flood-ready.

## DOOR-TO-DOOR FLOOD EDUCATION

PUB visits residents and shop owners at their homes and places of business in flood-prone areas and hotspots, before the Northeast Monsoon season, to educate them on flood safety.

## ENGAGING BUILDING OWNERS ON DRAINAGE REQUIREMENTS

Building owners are required to maintain drainage systems and implement flood protection measures.

## DRAINAGE SYSTEM INSPECTIONS & STAKEHOLDER ENGAGEMENT

PUB carries out regular inspections of the stormwater drainage system and conducts stakeholder education on drainage requirements and flood protection measures.
