

# TSS-LYNK™

by Absolute Instrument Systems

**Automatic TSS (Total Suspended Solid) Monitoring System. Web-based, SMS-alerts, CCTV monitoring and recording.**

Applying mobile-phone and internet technologies, the TSS-LYNK™ automatic monitoring system offers savings in penalties and man-hours required in compliance with the **Sewerage and Drainage (Surface Water Drainage) Regulations**; monitoring to ensure that the treated discharge does not exceed the 50 mg/L limit specified under Regulation 4(1).

Sensor placed in the discharge tank measures and analyse the TSS values. Data are transferred to a secured website, and SMS alerts will be sent to designated persons whenever TSS limits are exceeded. Providing Project Managers and ECOs with a tool to monitor and control sediment in construction sites.

- Automatic analysis with reference to legal requirements of 50mg/L.
- SMS alerts
- Does NOT require site PC to be ON 24hr.
- Web-based, Real-time TSS readings and CCTV monitoring (user-password protected)
- Various web-based report formats, including Daily-12hrs and full report can be viewed anytime, anywhere. Even on mobile phones\*.
