

**EnvProTech Pte Ltd** is a company specialized in Environmental Monitoring and Assessment System for the construction sites. We provide "One-Stop Monitoring system" for effective implementation on ECM monitoring solution. Our specialities are:

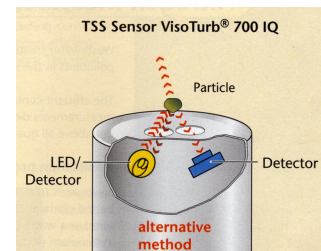

- Water treatment monitoring system (TSS)
- CCTV camera monitoring system

EnvProTech ECM monitoring solution equips your business with the following capabilities:

- **Web-based Monitoring** – Access information about equipment or sites being monitored anywhere, anytime.
- **One Integrated View** – Provide integrated information, not just summary information, but detail moment by moment data, in addition to your surveillance cameras.
- **Early Warning Alarm Notification** – Set different thresholds and configure alarm notifications to avoid impending problems. Designed to accept any third party sensor.
- **Protect Client Investment**

### EnvProTech TSS On-Line Monitoring System

Deploy **WTW System 2020XT** and **ViSolid® 700 IQ** sensor from Germany, an optical sensor that performs according to the principle of scattered light method for suspended solid measurement.

With enormously wide measuring ranges of 0 – 300g/l SiO<sub>2</sub> using AutoRange function for the best resolution of each measured value, it covers almost all applications ranging from drinking water to highly concentrated sludge.

It incorporates a completely new, innovative and effective ultrasonic cleaning system providing reliable measurements for continuous operation from start, which guarantees low maintenance and long-term reliability of the sensors.

Sensor without ultrasound cleaning system  
*After 16 Days*

Sensor with ultrasound cleaning system  
*After 16 Days*

#### Features and Benefits

- **Integrated, wear-free automatic cleaning system**
- **Extremely low maintenance**
- **SMS Alert Triggering System**
- **Built-in Data logger**

## EnvProTech CCTV Camera On-Line Monitoring Series

Specially cater for outdoor environment and construction sites with various needs and requirements, in terms of network infrastructure and types of camera to be used. The objective is to achieve a bigger return with lower investment cost.

- 3G Network Infrastructure
- Wireless Local Network Infrastructure
- Wired Network Infrastructure

Comparison of various Network Infrastructures is tabulated below:

	<b>3G</b>	<b>Wireless</b>	<b>Wired</b>
<b>Location of DVRDVS</b>	Local	Local	Site Office
<b>Mobility</b>	★★★★★	★★★	-
<b>Real-time Recording</b>	★★★★★	★★★★★	★★★★★
<b>Scalability and flexibility</b>	★★★★★	★★★★	★
<b>Remote accessibility</b>	★★★★★	★★★★★	★★★★★
<b>Cost effectiveness</b>	★★★★★	★★★★	★

EnvProTech Pte Ltd also provides other monitoring systems like Noise Monitoring System, Air Quality Monitoring System (PM10) and Vibration Monitoring System to cater to the construction site requirements.
