

Userguide for Hydrao Device App

Step 1: Download “Hydrao for PUB Smart Shower Programme” App at Apple’s App Store or at Google’s play store.

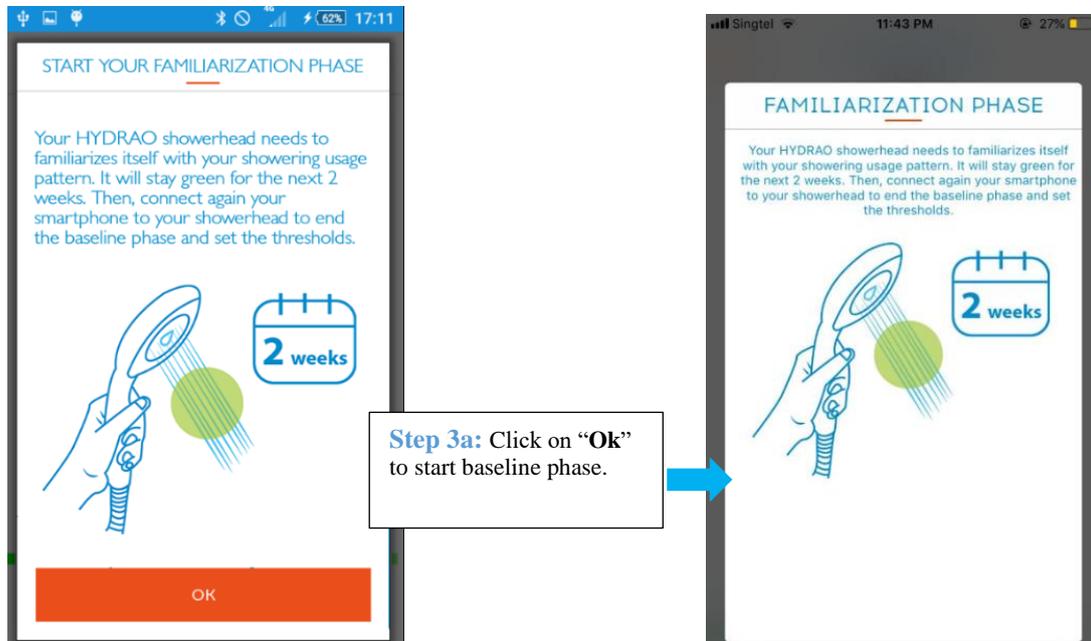

**Hydrao for PUB
Smart Shower Pr**
SMART AND BLUE

Step 2: To connect to the smart shower device, turn on Bluetooth on your smartphone, open up the app and **stand less than 3 meters** from the device. Once you are connected, the app will bring you through a tutorial.

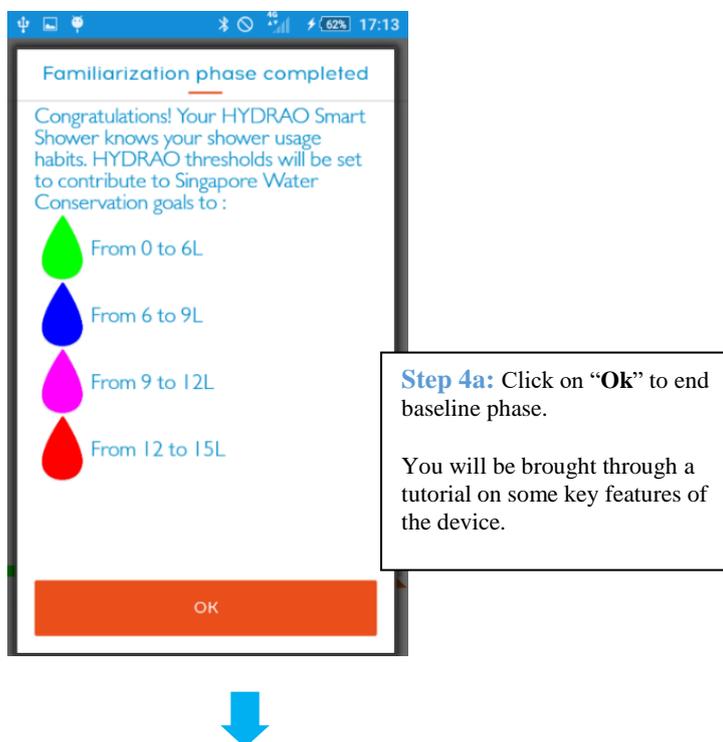

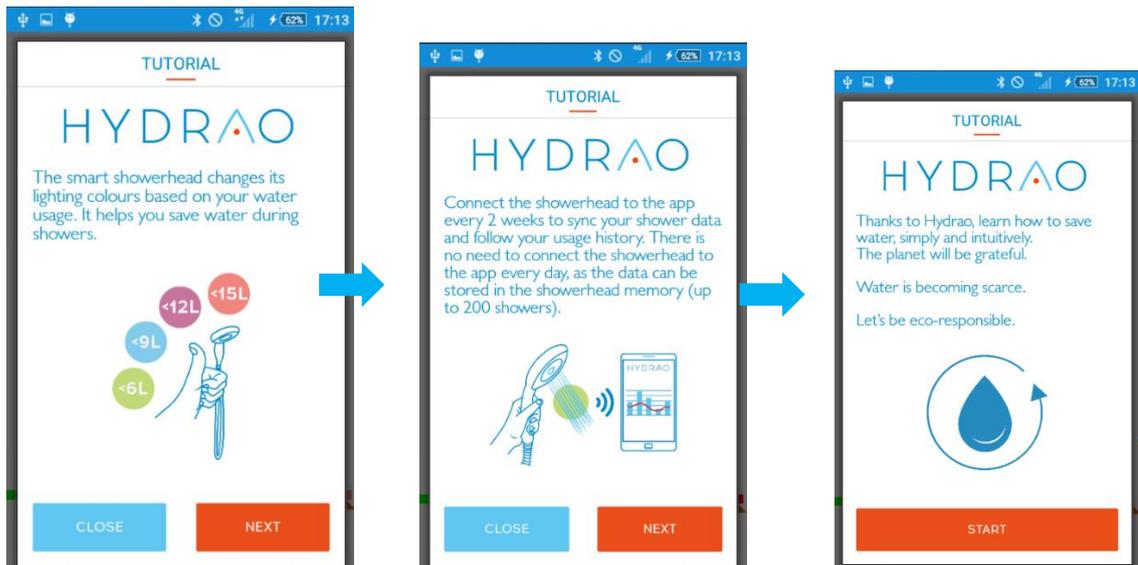

Step 3: Start to use the smart showerhead and you will enter a baseline phase for **the first 2 weeks** to allow the device to familiarise itself with your shower usage pattern.

During this period, the showerhead will be green all the time.

Step 4: After two weeks, you can log in to the app again to end the familiarization phase before customising your goals.

Step 5: Select “Set up the showerhead” tab on your left menu to customise your new goals.

Step 5a: Set your new goals by clicking on the respective water droplet/s, and slide up for a higher target and down for a lower target. To change the colour of each goal, turn the coloured wheel either clockwise or anti-clockwise.

Step 5b: Once confirmed, click on “Confirm settings” to activate new goal setting on the device.

The recommended goal setting is at 15 litres per shower.

Step 5c: You will be able to monitor your shower progress in real time through the app via “My shower” tab.

Step 5d: You can also view and track your past water consumption via the “**My water usage**” tab via the app. You may select on the above numerical tab to select the no. of past showers you want to view (i.e. 20, 100 last showers, etc).

Step 5e (Final): Set reminders to sync the shower data stored in the device to the app every 2 weeks to avoid losing them. The smart shower devices can currently store your shower data for up to 200 showers only.
